01.12.2009 om 20u00

## KHLim - Media & Design Academie

Beba Restelli spent many years working for the creative children's laboratory by Italian designer Bruno Munari (product designer, graphic designer, theoretician and writer). The creative lab was an avantgarde experiment for the 'metodo Munari®', the well known form of creative thinking. Restelli is the co-initiator of the Masters' Degree in the Metodo Munari®. She is a worldwide ambassador for Munari's revolutionary ideas regarding the development of children's creativity, in the form of workshops, lectures, exhibitions and training.
